

## Sewer Work at Broadview & Danforth: starting May 7/23

- Work will take place at the intersection of **Danforth & Broadview (south-west side, near Pizza Pizza) and at Broadview & Withrow from May 7 to June 17.**
- Work will take place from **7 p.m. to 7 a.m. (evening/overnight).**
- Staff expect the work to take up to **three weeks at intersection of Danforth Ave. & Broadview Ave. and two weeks at Broadview Ave. & Withrow Ave.;** one week contingency has been added. It should be noted that they may be able to accommodate a pause in the work during this period to avoid impacts to scheduled nights deliveries, etc.
- During the work at the intersection, right-turns (going south from Danforth Avenue onto Broadview) may be restricted. The contractor's traffic control plan will be reviewed by Work Zone and we will have confirmation ahead of construction starting.
- **The contractor will demobilize and remove the lane restriction after each shift.**
- Work will include: cleaning, preparation and lining of the sewers. Note localized excavations at maintenance holes may be required to facilitate the work.
- At both locations, the contractor will set-up bypass piping within the work zone that will be removed after each shift.
- Businesses or residences that have their sewer connected (those that front onto the work area) can expect short-term (6-8 hour) service disruption where water cannot drain to avoid backup. Special accommodation may be feasible to avoid a sewer service disruption for some users that need water over night by installing a cleanout connection.
- TW's contractor will issue a Service Disruption Notice will be sent out 48hrs in advance to impacted residents/business.
